Print No. **92104-1**

MODEL NO. TC-3926

23" Console

CABINET: Contemporary model in Walnut finish.

DIMENSIONS: H. 28-3/16", W. 33-3/4",
D. 16-7/16".

SPEAKER COMPLEMENT: Two 4" speakers.

Designed with special provision for UHF (optional, extra).

Due to RCA's policy of continued product research and development, specifications are subject to change without notice.

POWERFUL NEW VISTATUNER pulls in sharp detailed pictures even from those hard-to-get stations. This highly sensitive, wholly dependable tuner is RCA's finest - the "Nuvistor" tube is GUARANTEED 5 YEARS.

SOLID COPPER CIRCUITS replace old-fashioned handwiring for greater dependability, better performance, fewer service troubles. Circuitry of this type is especially designed for use in space satellites and computers. Circuit boards are GUARANTEED FOR LIFE.

INSTANT-PIC CONTROL ends warm-up wait - you get picture and sound immediately! TV remains on "stand-by" so that picture and sound are ready to come on at once. All power can be disconnected by "Holiday" switch.

SPECIAL CHASSIS delivers 18,000 volts of picture power.

STATIC-FREE "GOLDEN THROAT" FM SOUND. Speakers amplifiers and cabinets are scientifically matched for Balance Fidelity performance.

PRE-SET FINE TUNING. After only one adjustment to each channel the set automatically remembers to give you the best picture whenever you change stations.

AUTOMATIC SCENE CONTROL CIRCUITS (DC Restoration) provide increased contrast - picture quality remains stable as the camera moves from scene to scene.

SOLID STATE SILICON RECTIFIERS and RCA "Dark Heater" tubes combine cool-operation with a rugged reliability that means an extra long life for your set.

RETRACE LINE EXTINGUISHER eliminate diagonal lines from the picture.

23" DEEP FOCUS PICTURE TUBE projects the full picture as the camera sees it. Solid, one-piece front glass means reduced reflections, nothing to remove for cleaning - just wipe face of tube with cloth.

HIGH-LEVEL CONTRAST CONTROL gives full range contrast without distortion, excellent daylight viewing.

AUTOMATIC CHANNEL EQUALIZER (Keyed AGC) compensates for TV signal variations to minimize "fading". Picture stays clear and steady locked in place by Stabilizer Circuits (Noise Suicide) which guard against interference that causes "tear-out" and "bounce".

PUSH-BUTTON CIRCUIT BREAKER eliminates fuses and service calls for fuse replacement.

RCA FACTORY SERVICE CONTRACT - available only to RCA TV owners - for expert installation and service by RCA's own technicians.

CANADIAN STANDARDS ASSOCIATION. Listing assures high safety standard against fire or electrical hazards.

GOOD NEIGHBOUR DESIGN means your TV will not interfere with neighbour's TV or with other sets in your home.

CABINETRY by skilled cabinet makers at RCA's Owen Sound Furniture Plant.

CUSTOMER WARRANTY. In addition to the Five Year guarantee on "Nuvistor" tuner tube and Lifetime guarantee on Solid Copper Circuits, RCA TV carries a One Year warranty on all parts including tubes and kinescope.
