## INTRODUCING **DIMENSIA IV** SPATIAL SOUND

An excitingly new option from RCA that provides an enhanced stereo effect and added listening pleasure.

Here's how it works.

By incorporating special advanced circuitry into many RCA Console models, owners can, at the time of purchase or at a later date, add two additional matched speaker enclosures to their stereo system. These two extra speakers project the ambient tonal range, while the speaker system within the console continues to project the complete sound range. By merely pressing the DIMENSIA IV control button on their consoles, the listener can surround the listening area with exciting, enhanced stereo sound.

## RCA DIMENSIA IV- SPATIAL SOUND

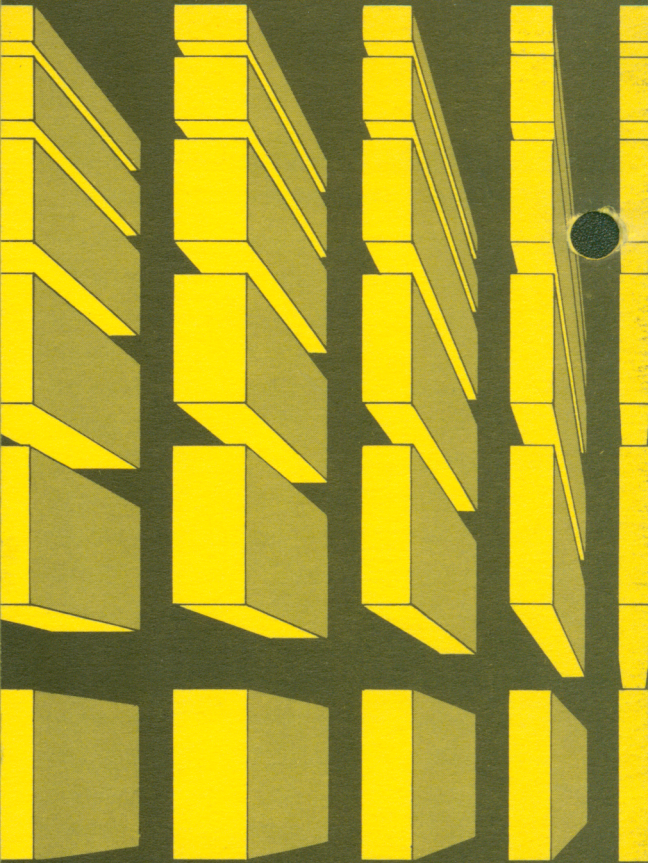

let your RCA man  
demonstrate the  
difference it makes.

Below are shown just some of  
the possible speaker arrangements.
