

VICTOR

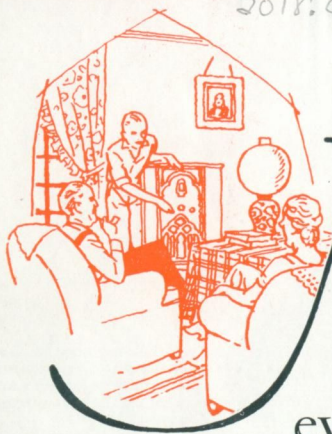

Battery
Operated

RADIO

featuring
"B" Amplification,
Automatic Volume Control,
Advanced Super-Heterodyne

Now!

you can have
every up-to-the-minute
improvement in a battery radio

FOR the first time, Victor makes available in a battery set every convenience, every advanced feature of the latest Victor all-electric Super-heterodyne at a price sensationally low.

Consider these up-to-the-minute features:—

CLASS "B" AMPLIFICATION. The startling new discovery in audio amplification. It gives you four times the output provided by the ordinary circuit and yet it uses only one-half the battery drain. The set is steeped with a reserve of power sufficient to bring in *at good room volume* the most distant broadcasting station.

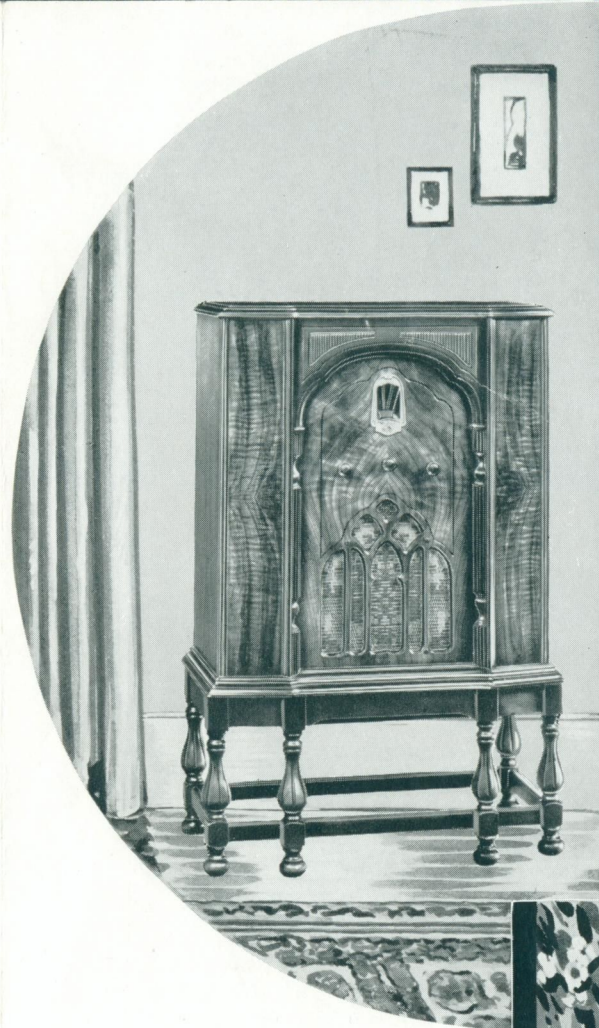

AUTOMATIC VOLUME CONTROL. And now — complete enjoyment of every radio program. This control unit practically eliminates fading and blasting and minimizes the noise level between stations.

ADVANCED SUPER-HETERODYNE PERFORMANCE. The unparalleled selectivity and sensitivity of the Victor AC receivers. Equipped with the Victor dynamic speaker to reproduce the greater frequency range and increased power output.

NO TROUBLESOME BATTERY RECHARGING. The use of the Air Cell A battery eliminates all battery recharging. This new battery provides 1000 hours of continuous operation.

MAGNIFICENT ACOUSTICALLY-CORRECT CABINETS. Victor offers you a choice of two battery receivers, the Console or Mantel models. The striking beauty of the highly-polished walnut-veneered cabinets makes them the equal in distinctiveness of design and in fine woods with any of the models in the Victor line.

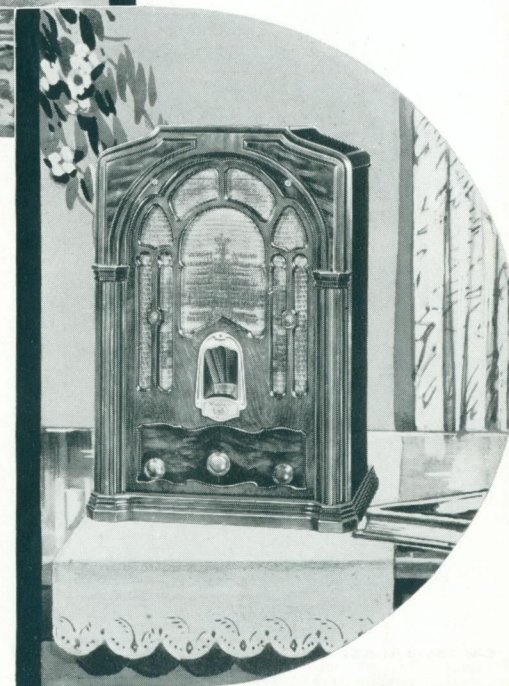

A mere listing of the many advanced features in this set cannot truly convey to you what these engineering achievements signify. Only a demonstration can reveal the glorious Victor tone, the power, the matchless performance of this outstanding musical instrument. Ask your Victor dealer for a demonstration. A revelation in battery radio performance awaits you!

*The 8-tube
Console R-68*

\$117.00

*including tubes
less batteries*

*The 8-tube
Mantel R-67*

\$87.50
