

The sound is better

on
RCA VICTOR

**HIGH FIDELITY
RECORDINGS**

What is HIGH FIDELITY?

This is a question that many record buyers are asking nowadays. The truth of the matter is that different people will answer differently. An audio engineer might talk in terms of cycles per second, decibels and percentage distortion. To the average music lover, however, such a definition is meaningless, since to him the vital test is how a record sounds. With that in mind, High Fidelity can best be described as "the greatest possible likeness to the sound of the original performance."

To achieve such faithful reproduction, both records and reproducer play their respective parts. For fully satisfactory results, the one has to be as good as the other.

High Fidelity records have been in existence for several years. The first step towards this achievement was when RCA Victor introduced vinyl plastic records in 1946. This material exhibits high response characteristics and is virtually free of irritating surface noise. The second important step was the advent in 1949 of magnetic tape for recording purposes. Almost all RCA Victor records since then have been "High Fidelity" records within this true meaning of the term.

As a result, the listings on the following pages represent the greatest collection of High Fidelity recordings in the world — greatest in quantity, greatest in quality of sound and quality of performance.

Certain albums in this catalogue are starred "New Orthophonic" High Fidelity. They are the finest examples of High Fidelity sound you can get. Like all others listed, they are wide range recordings, but, in addition, special microphones and studio acoustics have been used to produce on them a brilliant, highly defined sound which features maximum separation between instrumental players, plus exceptional clarity and presence of solo instruments.

Prove to yourself that RCA Victor sound is best. On any record player it is excellent. On High Fidelity equipment it is superb.

For complete album
information see RCA Victor's
general catalogue.

Red Seal albums are classified by the following prefixes:
LM, LRM, — Long Play • ERA — "45 Extended Play" (one record)
ERB — "45 Extended Play" (two records)
