SUPER SCREEN-GRID

THE new Majestic Models not only use a Super Screen-Grid circuit, but Screen-Grid is used for *power detection*. This is a distinct step ahead by Majestic. Four Screen-Grid tubes of type "24" are used in this latest Majestic, two type "45" power tubes and one type "80" rectifying tube.

SUPER-COLORATURA DYNAMIC SPEAKER

A NUMBER of important improvements and changes have been made in the Majestic Super Colortura Dynamic Speaker, resulting in even more vividly realistic and *colorful tone*. The highest notes of the lyric soprano or deepest bass notes are reproduced in their true naturalness by this most advanced of all Dynamic Speakers, an exclusive Majestic product made in the Majestic factories.

NEW CABINET BEAUTY

MAJESTIC designs, always extremely beautiful and in advance of others, have been further improved. A new motif in design has been achieved, as will be seen from the round corners of the Model 131, the shaped front of the Model 132 and irregular and pleasing design of the Model 233 Combination Radio-Phonograph.

Not only in design but in *finish* has a new high peak of beauty been set by the latest Majestic Models.

MODEL 92

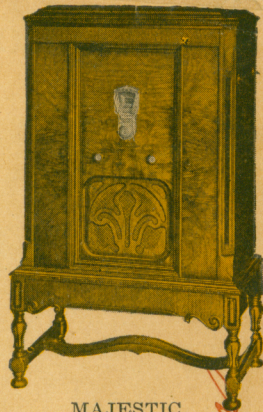

Other
MAJESTIC MODELS
Without Screen-Grid

THE four Majestic models illustrated, as well as Models 90 and 102, have the advanced type 8-tube Majestic chassis without Screen-Grid. They have Colortura - Dynamic Speakers. Super-Selectivity. Absolutely no hum. Rich, highly-figured walnut cabinets.

MAJESTIC
MODEL 91

Model 92, Highboy with Jacobean period cabinet; Model 93, the new Console type cabinet with beautifully matched butt-walnut centre and side panels; Model 91, Lowboy of early English design; Model 103, Combination Radio - Phonograph with compartment for two record albums.

Last Year's
Brilliant Performance
by

Majestic

*Made Even More Brilliant
by Super Screen-Grid*

35% more selective than
previous models!
50% more sensitive!

THESE important advances in Majestic Radio performance have been brought about through the success of Majestic engineers in building the proper type of Screen-Grid circuit. A new standard of fidelity is set by Majestic, due to the performance of this new receiver in conjunction with the Super-Colortura Dynamic Speaker. Again Majestic takes the lead on merit and merit alone.
